

Coloured flashlights / torches

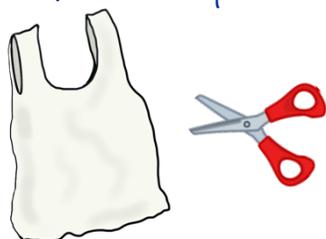

You will need:

- Plastic bag (remember to reuse one)
- Markers. If the plastic is white you can paint it
- Scissors
- Tape and/or rubber bands
- Flashlight or torch

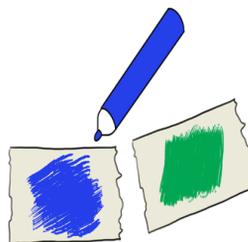

How to do it?

- 1 Cut squares of plastic bigger enough to wrap the flashlight/torch top

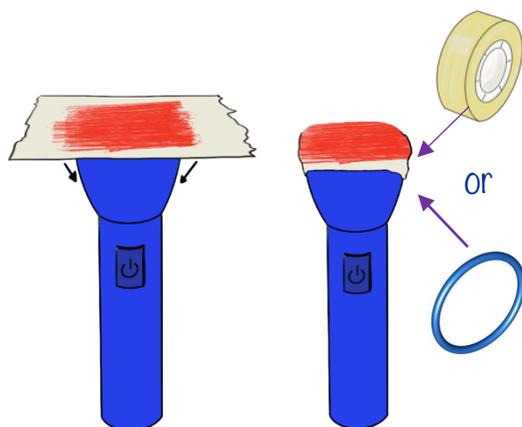

- 2 If you are using colour plastic pieces, go to step three. If your plastic squares are white, then paint them with the markers

Tip:
You can also draw faces, animals, letters... be creative!

- 3 Wrap the top of the flashlight/torch with tape or hold it with a rubber band

- 4 That's all! Now you can play in a room with little light.
